

AVENCO

SD Encoder + All in one DTV exciter option

Overview

AVENCO, Audio Video exciter receives existing SD grade analog video audio signals of Set Top Box, Camera, VCR and DVD player and encodes the analog signals to digital signal. The encoded digital signals are finally modulated with 8 VSB and output to UHF/VHF channel. Normally this product is used for SMATV systems and In house Broadcasting and CCTV systems for retransmitting the satellite and CCTV signals through coaxial cable.

Key Feature

Basic Feature	- Real time MPEG-2 encoding and ATSC Modulation
Feature	<ul style="list-style-type: none"> - MPEG-2 SD Encoding - High Quality Video Processing - Audio Level Controlling - Dolby AC-3 / MPEG 1 Layer 2 Audio Support - Front Panel LCD Drive Menu - Easy Setup Operating - UART Controlling - Remoting Controlling by LAN - ATSC Modulation - VHF/UHF Output <ul style="list-style-type: none"> - Frequency : 54.0 ~ 860.0 MHz 100Khz Step - Level : -15.0 ~ 7.0 dBm - 2ch A/V selection Support
Input Interface	<ul style="list-style-type: none"> - Component, S-Video, CVBS1, CVBS2 - ASI-IN, 100BASE-T
